Getting started

Once your account has been set up. You will receive an email from ipshare@minesoft.com asking you to set your password.

Click on the *Set password* link and you will be taken to the IP Share website. Simply enter a new password and click the *Set Password* button.

After the password has been reset, you will be taken to the sign-in page where you need to enter your email address and newly set password before logging in.

Setting notifications

It's possible to set up and choose how frequently you would like to receive notifications on projects. The first way is to navigate to the *Settings* page, then to *Default Navigation Interval*.

	Pass	sword	Reset	
New pas	sword			
Confirm I	New Pass	word		

Please choose how frequed ded to:	ently you would like to receive notification
Notifications not set	\$
Notifications not set Hourly Every 6 hours Daily Weekly Monthly	changing document ranking on't be asked for confirmation when u

Alternatively, you can set your notification settings by project by clicking on the icon in the right-hand column of the project table:

As an administrator on the account, you can also choose whether to disable or enable notifications across the entire account from the *Settings* page.

Page 2 of 41 IPShare user guide support@minesoft.com

Adding your company logo

It's possible to add your corporate branding in the form of your company logo to your IPShare account. To do this, you'll need to navigate to the *Settings* page and scroll down to the *Organisation Settings*. There will be an option to upload your logo.

Usage stats

Administrators can view the usage stats for the account or organisation from the *Settings* page. Simply scroll down to Organisation Settings and select the Stats button in the right-hand corner.

Change company logo			Other settings
Drganisation logo Choose a file	Browse	Ichal patent solutions Cartar - Basedart - Bashington - Days	Allow notifications If this is unchecked, it will prevent all your organisation's users to receive notifications
Recommended dimensions: 300 x 100 px Max size: 500KB			Show online users When this setting is enabled, an icon indicating whether a user is logged in will appear next to their username

A new page will load with a breakdown of your organisation's usage:

Start by adding new users, clicking the *Add new user* button. A pop-up window will appear asking for the name and email address of the new user you wish to add. There is also an option to make this new user an administrator.

As an administrator you can choose to either set the password for the user yourself or send them an email so they can set up their own password.

Once you have added your users, you can now set up a user group. This group will then be able to work on one or more projects depending on how you assign their permissions. We will go into this in more detail in the next section.

Please complete the	form below to add your new user

Add new group	×
Please complete the form below to add your new group	
Name	
Client name	
Submit	

Click *Add new group*, a pop-up window will appear so that you can select a name for the new group.

Now that you've created your group, you can assign users, delete or rename the group.

Clicking on the add user button will bring up a pop-up window where

you can tick which users you would like to include in the group. For example, Ruth, Matthew, Caitlin and John will be added to my group "Client name".

Name	^{↑↓} Members	t⊥
End User Group	3	e • •
Client 2	4	(*)
Client name	0	Z = <mark>-</mark>

Please note, deleting a user does not erase their work (all documents, chat entries, annotations etc. they may have created will stay on the account)

DOI Number	https://doi.org/10.1051/bmdcn/2019090102						
URL	http://dx.doi.org/10.1051/bmdcn/2019090102						
Publication Date	2019-2-22						
Title	Materials and structures used in meniscus repair and regeneration: a review						
Citation	Publisher: EDP Sciences Authors: <u>Ketankumar Vadodaria</u> , <u>Abhilash Kulkarn</u> i, E <u>Santhin</u> i, Prakash <u>Vasudevan</u>						
Text	Meniscus is a vital functional unit in knee joint. It acts as a lubricating structure, a nutrient transporting structure, as well as shock absorber during jumping, twisting and running and offers stability within the knee joint. It helps in load distribution, in bearing the tensile hoop stresses and balancing by providing a cushion effect between hard surfaces of two bones.						
	Cancel Impor	t					

Once you have imported NPL documents you can continue to edit them within IPShare.

Notice that as you upload documents your recent activity will be logged on the righthand side of the project, under Recent project activity. This logs all activity on the project and is viewable by all users on the project.

> Page 10 of 41 IPShare user guide support@minesoft.com

Importing from PatBase

Another way to import patent documents into IPShare (for PatBase users only), is from the search history in PatBase.

Project Please select a project or create a new one to import the documents to:	

You will be given the option to either import the documents into a current project or "create a new one". If you need to create a new project, a pop-up window will appear where you need to provide a project name and description. When you have submitted this information, you will return to the page and select the newly created project from the drop-down menu.

The documents will then be imported as usual.

Page 12 of 41 IPShare user guide support@minesoft.com

Editing a project

It's possible to change the project name, set notification intervals and add a project description, to do this navigate to the Edit Content button in right-hand column of the project table.

A pop-up window will appear, like below:

Notification interval:
Notifications not set
Project name:
Test Project 26-Feb-2019
Project description:
Project description
Carchive Submit

From the *Notification interval* drop-down menu, you can choose how often people on the project receive notifications, the following options are available: hourly, every 6 hours, daily, weekly.

Rename the project by entering a new name into the input box for *Project name*.

Enter a project description by entering it into the input box under *Project description*

Setting up users on a project

To set up users on a project, navigate to the *Permissions* tab on the project page.

You can choose to add a user group or add users individually. If you add users as a group, their permission levels will all be the same, if you want different users to have different permission levels then you will need to do them individually. Click the Edit button to the right of the user name or group name to open up the different permission levels.

The options available are extensive. In this example, I am setting up the user to be able to view and export all areas of the project, but they wouldn't be able to make any changes to the project.

Page 13 of 41 IPShare user guide support@minesoft.com

					Project	Project Read	
Groups	Usors					Include the project in the user projects list Project Write

					Export	Espect Project Allow the user to seport the project contents as an escal generableset	
					Notifications		

Just select the permissions you want to include for each user or group and then return to your project.

You can also bulk select permissions by "Read all" or "Write all" by using the switch at the top of the page:

Group: End User Group					
🔵 Read all	🔵 Write all				

Please note, the permission levels you assign on a user level take priority over group permissions. For example, if you add a group that has permission to apply labels and then add a user which also belongs to the same group but you remove their ability to apply labels, this will have priority.

Filtering & sorting

You can filter your document table on a project page by label or by document type, publication number, title, assignee and publication date.

To filter by label, open the drop-down menu at the top-right of the document table, and select the label you want to filter by.

To filter by document type, publication number, title, assignee or publication date, please use the input box at the top-left of the document table.

Please note, Boolean operators and truncation will not work when applying filters.

Creating a highlights set

To create a highlight system, navigate to the *Highlights* tab on the project page. The (1) below indicates that I already have one highlights set for this project.

Click Create Highlight Set.

Page 15 of 41 IPShare user guide support@minesoft.com

Add new highlight set	×
Please complete the form below to add your new highlight set Name Iaunder	:
Submi	t

You can create an unlimited amount of highlight sets, for different areas of the project.

Please note, each highlighting set is only applied to the current project.

Once you've entered a name you can input the keywords you would like highlighted and choose a colour for each.

Edit Term		×
	soften*	
The highli	ghting supports the * (wildcard) operator at the beginning and/or at the end o	f the term
	Save new term	Cancel

The "*" truncation is activated, so for example if you used "soften*" this would highlight "softened", "softener", "softening" etc.

Page 16 of 41 IPShare user guide support@minesoft.com

Creating labels

To create a label, navigate to the *Label* tab on the project page.

Searching across a project

Once you have set up your project, it's possible to run a search across all documents in the project. To run a search, navigate to your project page and select *Search Project* in the top right-hand corner.

🎻 Highlights (2) 🟈 Labels (3) 📜 Export Project 📑 Export Summary 🔒 Permissions 🔍 Search Project
--

A pop-up window will appear where you can search keywords, inventors or assignees etc. Here we have searched keywords as an example, but this search feature covers the full text document and all bibliographic information.

Keywords or names searched within quotation marks ("") will be searched as an exact phrase in that order. Words outside these quotation marks will be searched connected by the Boolean operator AND.

This means, in this example, the word "drug" can appear anywhere in the full text of a document that also contains "rheumatoid arthritis".

Page 18 of 41 IPShare user guide support@minesoft.com

Search Project ×
Search ①
3 Results(s) US2003007964AA - METHOD FOR TREATING RHEUMATOID ARTHRITIS WITH COMPOSITION CONTAINING HISTONE
US2006058363AA - NITRIC OXIDE RELEASING SELECTIVE CYCLOOXYGENASE-2 INHIBITORS
US7507742BB - SPIROCYCLIC DERIVATIVES

Please note, Boolean operators and truncation won't work when searching across your project

Once you have entered your query, click the magnifying glass icon to search. Any results will be listed below your search query. Click on the titles to be taken to the document of interest. You can navigate across the search results using the "Previous" or "Next" buttons, or press "Delete search results" to cycle through the entire project again.

Tree View

On the Projects page, it is possible to see an overview of existing projects through the Tree View.

Above the Projects table, there is a blue button labelled "Tree View"

Clicking this will open a new view with a collapsible tree diagram of projects grouped by Account. To expand or collapse an account, click on the + or – signs next to the account name respectively.

See following page for an example of the information displayed.

Page 22 of 41 IPShare user guide support@minesoft.com

Adding annotations

To add an annotation to a document, just use your cursor to highlight the section that you would like to add a comment on, like below:

A button will appear on the right-hand side which you can click to add an annotation to this section. Type your note into the input box which appears. Once you've clicked save the relevant section will be underlined with the comment shown to the right-hand side.

interesting, plec	ise check

Other users will know that there is an annotation added as it will be shown on the Bibliography, Claims or Description tab at the top (depending on which section you added the annotation in).

Bibliography Claims Description [1]	
TECHNICAL FIELD 0001) This invention relates to a process to form granules that deliver an encapsulated liquid laundry benefit agent to laundry via a wash iquor, it also relates to the granules obtained by the process, to a laundry composition including the granules obtained, and to the use of such compositions.	
BACKGROUND TO THE INVENTION [0002] It is well known to deliver to a wash liquer a liquid benefit agent protected in the form of an encapsulate or microcapsule. Encapsulated perfume is such a liquid benefit agent protected in the form of an encapsulate into detergent formulations include; high shear granulation, low shear granulation, spray drying, spray-cooling, aggiomeration, extrusion spinning disk, and layering. Except for layering, these processes initially produce a particle or granule containing a high livel of encapsulate benefit agent. The particle or granule is then introduced into the laundry composition. However, especially in the case where the benefit agent is to be delivered from a machanically rupturable encapsulate in the bonefit agent to the wash lique. This is undesirable if the benefit agent is designed to be deposited on the fabred in its encapsulated form; is, for layer to the wash lique, this is undesirable if the benefit agent is designed to be deposited on the fabred in its encapsulated form; is, for layer to the wash lique, this is undesirable if the benefit agent is designed to be deposited on the fabred in its encapsulated form; is, for layer release of perfume during war of a garment. (Eg, by machanical stresses, sieve fractions, drying).	Interesting place check

Page 23 of 41 IPShare user guide support@minesoft.com

Legal Status Browser

To access the legal status browser, click *Family/Legal Status* underneath the patent number and title when viewing a document.

The browser will open in a new window.

Legal status event groups

The Legal Status groupings are based on the INPADOC PRS codes and the patent office codes from each national patent office. We allocate them into a category making them easy to manage:

LSAS	Reassignment	LSNP	Entry into national phase
LSDW	Deemed withdrawn/abandoned/cancelled	LSOP	Opposition/filed/request for revocation/annulment
LSES	Examined/supplementary search report issued	LSPB	Published
LSFE	Renewal fees paid	LSRE	Restored/reinstated/amended/partially amended
LSGT	Granted/extended (supplementary protection certificate)	LSRV	Revoked/rejected/annulled/invalid
LSLE	Lapsed/expired/ceased/dead	LSWD	Withdrawn/abandoned/cancelled/ surrendered/suspended/terminated/ void
LSLI	License	LSAP	Applied
LSNE	Non-entry into national phase	LSRX	Reexamination
LSAL	Appeal		

Timeline view

The timeline view shows the legal status history of each publication in a family. Above the timeline, there are options to filter by country or alternatively use the search bar to find specific information. You can also choose whether or not to show reassignments, show calculated expiry dates or show EP National Phases.

Filter by country: Open the drop-down menu and use the checkboxes to select which countries you are interested in, once you have selected all of the countries you would like to view, select OK. To remove the filter, open the drop-down menu again and select reset.

Show calculated expiry dates: The calculated expiry dates take into account the different patent terms for each country, the type of document, and additional

information (where available), e.g. Supplementary Protection Certificates (SPCs) and Patent Term Extensions (PTEs).

When the calculated expiry dates are activated, the timeline is extended into the future, ending with either a red or orange line. The red line symbolises a 'Calculated Patent Term Expiry', the orange line symbolises an 'Assumed Expiry'.

The table view shows the Application Number, Application Date, Publication Number, Kind Code, Source, Event Date, Event Code, Event Group and Event Details for each publication within the family.

The hyperlinked application number will direct you to the register where you can view more information about the legal status for the specific publication(s).

The table can be sorted by application number, application date, publication number, kind code, source, event date, event code, event group or event details by clicking on the arrows next to the relevant header.

Above the table, there are options to filter by country and event group or alternatively use the search bar to find specific information. You can also choose whether or not to show reassignments.

> Page 26 of 41 IPShare user guide support@minesoft.com

Reassignments

The reassignment table shows the publication number, date, assignee information, standardized assignee information, and most recent reassignment event.

Each publication can be viewed in the national patent office website, by clicking on the ^C next to the publication number. Alternatively, you can click on the publication number itself to load a *Publication Summary*.

Above the *Reassignment table*, there are options to filter by country or alternatively use the search bar to find specific information. In addition, there is a *Stats* option (shows table of all assignees in family & how often they occur), a *Show Inventors* option (adds 2 extra columns to the reassignment table with inventor information and a *Show Reassignment Histories* option (loads all reassignment histories).

EP1984486 A		20081029	~	~		~	Q	

The relationship table shows how the publications within a family are related by priority number by ticking corresponding priority numbers for each patent within the family.

The patent list shows which patents are associated with which priority numbers within a family. This tab is less useful for highlighting the priority relationships between publications in a family. The columns show the patent number, publication date and priority numbers.

The priority list shows which priority numbers are associated with which patents. This is useful for seeing which priority numbers are most common within a family. The columns show the priority number, priority date, and publication numbers.

The Priority relationship diagram is the most visually appealing option; therefore, it is useful for sharing. Download/print options are available in the top right-hand corner.

Page 28 of 41 IPShare user guide support@minesoft.com

Litigation

Where available, the litigation tab will show all litigation proceedings (US only) for a patent family. It can be viewed either by case or publication by selecting your preferred choice from the drop-down menu. The table can be sorted by Case Number, Filing Date, Court, Nature, Plaintiff, Defendant and Status by clicking the arrows in the top row.

Case Number	Filing Date	11 Court 11	Nature 11	Plaintiff 11	Defendant	Case Publication
2:10-ov-01932 🖸	2010-11-03	Nevada District Court	Patent	Robert Bosch LLC	Unipoint Electric MFG. CO., Ltd. and Unipoint North America

>> View Publications						
2:11-ov-14019 C	2011-09-14	Michigan Eastern District Court	Patent	Robert Bosch LLC	CAP America and Corea Autoparts Producing Corporation	

More information is available about the contested publication(s) by clicking *View Publications* underneath the case number of interest.

Download and print options are available for each section. An offline link can be generated and shared by email, or the data can be downloaded as an Excel, PDF or Word document.

Page 29 of 41 IPShare user guide support@minesoft.com

Chat messages

Chat messages can be accessed when viewing documents, a useful way to check in with other users on the project. You can access the chat from the right-hand side of the page.

When there are already messages present in the chat a double chat bubble icon will be shown, like:

If there is an unread message available, this will be shown in the document table for the project.

As an administrator you will be able to delete chat messages as required.

Please note, you need to click on the unread message icon to view the latest message in the chat.

Page 30 of 41 IPShare user guide support@minesoft.com Please note, chat messages are added on a document basis, i.e. there is a different chat for each document and no project chat

Notes

You can save Private and Public Notes on individual publications. Notes can be found in the Chat menu.

Public Notes will be shared with any members on the project with view permissions. Private Notes will only be viewable on the user's account.

Action history

The *Action history* tracks any changes made to documents within a project. You can access the *Action history* from the right-hand side when viewing a document.

Keyboard shortcuts

The following keyboard shortcuts are available:

Viewing documents

Ν	Next document
Р	Previous document
S	Sidebar toggle

Image slideshow

Ν	Next image
Р	Previous image
R	Rotate image

Page 32 of 41 IPShare user guide support@minesoft.com When navigating through documents using keyboard shortcuts, data is automatically synchronized across all open pop-up windows, e.g. PDF, legal status, TextMine.

Snapshot

On the project page, there is a link to Snapshot in the top right corner. This is a simple analytics tool to help you visualise your project.

📜 Export Project 🕴 📑 Expor	t Summary 🕴 🔒 Permissions	🔍 Search Project	👃 Alerts	🕅 Snapshot

Here, you can see a general overview of jurisdictions, assignees and documents in graph form. It's also possible to see an overview of the labels and ranks applied across a project.

Above each graph in the top right corner there is drop down menu where you can select the number of jurisdictions/assignees you would like to see if your graph.

Page 33 of 41 IPShare user guide support@minesoft.com

Exporting

Export Summary

The summary export is a one-page Excel spreadsheet which shows all information for patents or non-patent literature within a project. The information included in the summary export is as follows:

- Document type
- Family number
- Country code
- Publication number
- Kind code
- Publication date
- Application number
- Application date
- Title
- Abstract
- Probable assignee
- Claims
- Any chat messages
- Any public notes
- Any applied labels
- Any annotations (doesn't show where in the document was annotated)

Please note, the claims may exceed the maximum character limit for cells in Excel and be cut short.

To run this export, navigate to the project that you wish to export and click *Export Summary* at the top of the page.

Export Project

The full project export contains more details about each document in the project with the full bibliography, claims and description included in the export. It also includes the star ranking, label, and public notes for each document (where one has been given) and annotations (including where in the text the annotations are have been added).

The Excel file is separated into a spreadsheet for each document in the export, with a *Contents* page showing the publication number and title for each document included. To run this export, navigate to the project that you wish to export and click *Export Project* at the top of the page.

A pop-up window will appear with the option to remove the links to the original PDF, legal status browser and TextMine from the exported document. In addition, you can choose to filter documents in the export by labels or by ranking and you can set a custom sort order by selecting a sort criteria (options include sort by Publication Date, Date Added, and more) and order by ascending or descending. There is also an option to "Include images in the export", this is available where there are less than 900 images in the project.

On the *Alerts* page, you will see a table of alerts that are already running, with an option to delete or edit the alert. You can change the name, query, country/kind code, or type of update (i.e. new families only or new families and new members). The table will show the alert details, including the last run date and the last run

Page 37 of 41 IPShare user guide support@minesoft.com results. Underneath the alerts table you can check the number of alerts still available for your organisation to use.

Projects > Driver-less Cars > Alorts	Automatic processes and cars	
	PatBase Query	
Project: Driver-less Cars - Alerts	CPC=G01S1 AND TAC=(car*)	< Return to project
🌲 Alerts	Country/KD Filter	+ Create Alert
	E.g. DE WOA* GBA1	
Name : Query	Update Type	Last run result :
Driver-less Cars Alert TAC=((Driverless OR Drive	New families and new members +	2 new document(s) found
Number of clients available: 44	Test alert Save Cancel	

Once you have completed the fields, you can test the alert by clicking on the button in the bottom right-hand corner. If the query is correct, you will see how many results have been found, if it is incorrect, you will receive an error message like below (the message will vary depending on the error):

The Minesoft Support team will be able to assist if you have any problems when setting up an alert.

The alerts will run on a weekly basis and any results will be automatically imported into the relevant project; you can monitor alerts from the *Alerts* page. In addition, the alerts will be included under *Recent project activity*, clicking this will open up a popup window showing the patent number and title for the most recent run results.
